- 1 Certain Windows Vista product features require advanced or additional hardware. See <http://www.microsoft.com/windowsvista/getready/hardwarereqs.mspx> and <http://www.microsoft.com/windowsvista/getready/capable.mspx> for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.
- 2 Intel's numbering is not a measurement of higher performance.
- 3 Dual Core is a new technology designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology and 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture-enabled BIOS. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information.
- 4 1 GB = 1 billion bytes; actual formatted capacity is less. Up to 8 GB of hard drive (for XP and XP Pro on consumer and commercial notebooks) is reserved for system recovery software. Up to 9 GB of hard drive (for Vista on consumer notebooks) is reserved for system recovery software. Up to 10 GB (for Vista on commercial notebooks) is reserved for system recovery software. Up to 12 GB (for MCE on consumer and commercial notebooks) is reserved for system recovery software.
- 5 LightScribe creates a grayscale image similar to a black-and-white photograph. LightScribe media required and sold separately. Does not permit copying of commercially available DVD movies or other copyright-protected materials. Intended for your original content and other lawful uses.
- 6 AMD's model numbering is not a measurement of clock speed.
- 7 This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of the AMD Athlon 64 X2 technology. Dual core processing available with AMD Athlon X2 technology is a recent technology innovation designed to improve performance of the system. Given the wide range of software applications available, performance of a system including a 64-bit operating system and a dual core processor will vary.
- 8 DVD-RAM cannot read or write to 2.6 GB single-sided or 5.2 GB double-sided version 1.0 media. Does not permit copying of commercially available DVD movies or other copyright-protected materials. Intended only for creation and storage of original material and other lawful uses.
- 9 Windows Vista Business disk is also included for future upgrade, if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order at least 25 customer systems with the same custom image.

Offers are valid only until October 31, 2009. Pricing may not be combined with any other offer, promotion, or discount. Prices subject to change without notice.
