Mathematics  MATH

Degree:
A.S. – Mathematics
AS-T – Mathematics for Transfer

Mathematics  Associate in Science Degree

Program Information
The mathematics program provides students the opportunity to complete the lower-division coursework required for four-year programs in mathematics. For students who plan to transfer, completion of the CSU General-Breadth or IGETC general education pattern is encouraged. It is highly recommended that students meet with a counselor because major and general education requirements vary for each college/university. These courses also fulfill general education requirements for allied health, biological sciences, physical sciences, computer science and engineering.

Note: Students planning to transfer to four-year institutions are advised to meet with a counselor for general education requirements.

Note: The University of California has a credit restriction on certain combinations of mathematics courses. See counselor for detailed information on the current UC Transferable Course Agreement.

Career Opportunities
Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners and educators. This major is designed to meet some of the lower-division requirements for a major in Mathematics.

Upon completion of this program, the student will be able to:
• explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems.
• explain and apply basic concepts of multivariable calculus, linear algebra, or differential equation techniques, their interconnections, and their uses in analyzing and solving real-world problems.
• write logical proofs of basic theorems.
• analyze and evaluate various theoretical and real-world problems and analyze existing solutions or create and evaluate novel solutions using mathematics, logic, and technology as appropriate.

Required Program              Units
MATH 400 Calculus I......................... 5
MATH 401 Calculus II......................... 5
MATH 402 Calculus III....................... 5
MATH 410 Introduction to Linear Algebra.. 3
MATH 420 Differential Equations........... 4
A minimum of 3 units from the following:-----------------------------------------------3
CISP 360 Introduction to Structured Programming (4)
CISP 400 Object Oriented Programming with C++ (4)
CISP 401 Object Oriented Programming with Java (4)
ENGR 405 Engineering Problem Solving (3)
PHIL 325 Symbolic Logic (3)
STAT 300 Introduction to Probability and Statistics (4)
or STAT 480 Introduction to Probability and Statistics – Honors (4)

Total Units Required:                 25

Mathematics  Associate in Science for Transfer

Program Information
The mathematics program provides students the opportunity to complete the lower-division coursework required for four-year programs in mathematics. This program is for students who plan to transfer to a California State University (CSU). Completion of the CSU General-Breadth or IGETC general education pattern is required. It is highly recommended that students meet with a counselor because major and general education requirements vary for each college/university.

The Associate Degree for Transfer (ADT) student completion requirements (as stated in SB1440 law):
(1) Completion of a minimum of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
(A) The California State University General Education-Breadth Requirements or the Intersegmental General Education Transfer Curriculum (IGETC).
(B) A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
(2) Obtainment of a minimum grade point average of 2.0.

ADTs also require that students must earn a “C” or better in all courses required for the major or area of emphasis.

Career Opportunities
Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners, and educators. This major is designed to meet the lower-division requirements for most bachelor’s degrees in Mathematics.

Upon completion of this program, the student will be able to:
• explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems.
• explain and apply basic concepts of multivariable calculus, linear algebra, or differential equation techniques, their interconnections, and their uses in analyzing and solving real-world problems.
• write logical proofs of basic theorems.

Total Units:                           22
MATHEMATICS (MATH)

MATH 14 Preparation for Math – Success Academy 1 Unit
Prerequisite: Placement through the assessment process.
Hours: 18 hours LEC
This course provides an introduction to student learning expectations and the outcomes of higher education. This course has a specific focus on math preparation through the implementation of individualized group instruction for students. This course is primarily intended for students who will be taking an Arithmetic, Pre-Algebra, Elementary Algebra, or Intermediate Algebra course in the upcoming semester.

MATH 27 Self-Paced Basic Skills Mathematics .5-.2 Units
Prerequisite: None.
Hours: 24 hours LEC; 108 hours LAB
This is a self-paced course in basic mathematics skills including the basic operations of addition, subtraction, multiplication, and division applied to the whole numbers, fractions, and decimals. This course is graded Pass/No Pass. Credit is earned in one-half unit increments and is dependent on progress in the course and class participation. This is an open-entry/open-exit course which may be taken for a maximum of two units. This course does not fulfill the learning skills requirement for graduation.

MATH 28 Basic Skills Mathematics 3 Units
Prerequisite: None.
Hours: 54 hours LEC; 18 hours LAB
This is a lecture course with lab time in basic mathematics skills including the basic operations of addition, subtraction, multiplication, and division applied to the whole numbers, fractions, and decimals. This course does not fulfill the learning skills requirement for graduation.

MATH 34 Pre-algebra 4 Units
Prerequisite: MATH 28 with a “C” or better, or completion of the MATH 27 curriculum (80% or higher on all six chapter tests), or placement through the assessment process.
Hours: 72 hours LEC
The emphasis in this course will be on skills necessary for success in elementary algebra. Course content will include review of fundamentals of arithmetic including whole numbers, common fractions, decimal fractions, and percentages. Other topics include order of operations, signed numbers, complex fractions, exponents, and scientific notation. There will be an introduction to the algebra of polynomials and/or an introduction to graphing lines, as time permits.

MATH 80 Mathematics Study Skills 1 Unit
Prerequisite: MATH 28 with a grade of “C” or better, or completion of the MATH 27 curriculum (80% or higher on all six chapter tests), or placement through the assessment process, or concurrent enrollment in either MATH 27 or MATH 28.
Advisory: ENGRD 110 with a grade of “C” or better
Hours: 18 hours LEC
This course will help students increase their motivation and confidence and maximize their abilities in any mathematics course. Students will consider their current levels of math and test anxieties and make progress in lowering them to a productive level. Students will gain strategies to overcome barriers to mathematical success. Specific concepts will be designed for the current level of each student. This course is primarily intended for students who will be taking another mathematics or statistics course concurrently, but students may also take this course as preparation before enrolling in a mathematics or statistics course. This course is graded as Pass/No Pass.

MATH 100 Elementary Algebra 5 Units
Prerequisite: MATH 34 with a grade of “C” or better with, or placement through the assessment process.
Hours: 90 hours LEC
This course includes the fundamental concepts and operations of algebra with problem solving skills emphasized throughout. Topics include properties of real numbers, linear equations and inequalities, integer exponents, polynomials, polynomial factorization, rational expressions and equations, radical expressions and equations, rational exponents, systems of linear equations and inequalities, the rectangular coordinate system, graphs and equations of lines, and quadratic equations.

MATH 103 Elementary Algebra, Part I 3 Units
Prerequisite: MATH 34 with a grade of “C” or better with, or placement through the assessment process.
Hours: 54 hours LEC
This course will cover the first half of the traditional MATH 100 course. Topics include: properties of real numbers, linear equations and inequalities, integer exponents, polynomials, systems of linear equations and inequalities, the rectangular coordinate system, graphs and equations of lines, and applications.

MATH 104 Elementary Algebra, Part II 3 Units
Prerequisite: MATH 103 with a grade of “C” or better
Hours: 54 hours LEC
This course covers the second half of the traditional MATH 100 course. Topics include: polynomial factorization, rational expressions and equations, radical expressions and equations, rational exponents, quadratic equations, and applications.

MATH 110 Elementary Geometry 5 Units
Prerequisite: MATH 100 or 104 with a grade of “C” or better with, or placement through the assessment process.
General Education: AA/AS Area II(b)
Hours: 90 hours LEC
This course introduces Euclidean Geometry. Topics include sets, definitions, postulates, theorems, deductive and inductive reasoning, proof, parallel lines, triangles, polygons, congruence, similarity, constructions, the Pythagorean Theorem, right triangle trigonometry, circles, analytic geometry, and elementary solid geometry.

| MATH 402   | Calculus III                              | 5     |
| Prerequisite: MATH 401 with a grade of "C" or better |       |
| General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2 |       |
| Course Transferable to UC/CSU |       |
| Hours: 90 hours LEC |       |
| This course extends the concepts of limits, derivatives, and integrals to vector-valued functions and functions of more than one variable. The topics covered include three-dimensional analytic geometry and vectors, partial derivatives, multiple integrals, line integrals, surface integrals, and the theorems of Green, Gauss (Divergence), and Stokes. Many applications of calculus are included. (Competency: Mathematics) |       |

| MATH 410   | Introduction to Linear Algebra            | 3     |
| Prerequisite: MATH 401 with a grade of "C" or better |       |
| General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2 |       |
| Course Transferable to UC/CSU |       |
| Hours: 54 hours LEC |       |
| This course is an introductory course in linear algebra. Topics include matrices, determinants, systems of equations, vector spaces, linear transformations, eigenvectors, and applications. Proofs of elementary theorems of basic linear algebra will be covered. The course is intended for majors in mathematics, engineering, science, and related fields. (C-ID MATH 250; Competency: Mathematics) |       |

| MATH 420   | Differential Equations                    | 4     |
| Prerequisite: MATH 401 with a grade of "C" or better |       |
| General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2 |       |
| Course Transferable to UC/CSU |       |
| Hours: 72 hours LEC |       |
| This course will cover the theory and applications of solutions to ordinary differential equations and systems of ordinary differential equations. Students will be introduced to various topics useful in the solution of these differential equations including power series, Laplace transforms, matrices, eigenvalues and eigenvectors, and numerical methods. (C-ID MATH 240) |       |

| MATH 494   | Topics in Mathematics                     | .5-4  |
| Prerequisite: None |       |
| Course Transferable to UC/CSU |       |
| Hours: 72 hours LEC |       |
| This course provides the ability to take a course in mathematics that covers topics that are not part of the regular curriculum. This course may only be taken once, even if course offerings cover different topics. UC transfer credit will be awarded only after the course has been evaluated by the enrolling UC campus. The units completed for this course cannot be counted towards the minimum 60 units required for admissions |       |

| MATH 495   | Independent Studies in Mathematics        | 1-3   |
| Prerequisite: None |       |
| Course Transferable to UC/CSU |       |
| Hours: 162 hours LAB |       |
| This is an independent studies course. The topics are to be arranged between the instructor and the student. UC transfer credit will be awarded only after the course has been evaluated by the enrolling UC campus. The units completed for this course cannot be counted towards the minimum 60 units required for admissions |       |

| MATH 499   | Experimental Offering in Mathematics      | .5-4  |
| Prerequisite: None |       |
| Course Transferable to UC/CSU |       |
| Hours: 54 hours LEC |       |
| See Experimental Offering. UC transfer credit will be awarded only after the course has been evaluated by the enrolling UC campus. The units completed for this course cannot be counted towards the minimum 60 units required for admissions |       |
