Nursing, Registered NURSE

Degree:
A.S. – Nursing, Registered

Program Information
The Associate in Science Degree Registered Nursing Program at Sacramento City College is approved by the California Board of Registered Nursing. Students enrolled in this program are required to complete general education, science, and nursing courses with related clinical experiences in local hospitals. The nursing courses are four semesters in length.

In addition to regular expenses such as enrollment fees, living costs, activity fees, and books, nursing students have the expense of uniforms, equipment, malpractice insurance, graduation, and licensing costs. They also are responsible for their physical examination, immunizations, background check, and drug screen, as well as transportation to and from clinical agencies for day and evening learning experiences. All enrolled students must have a current health provider CPR with Automated External Defibrillator (AED) card. The nursing program is a full-time rigorous course of study. In order to ensure academic success and to protect students’ health, full-time employment is not advisable. It is recommended that students who must continue outside employment reduce their hours to 8-12 hours or less per week.

Nursing courses must be taken in sequence. Informational meetings are held several times each semester to provide prospective students with information about program prerequisites, enrollment process, and other requirements in the program. For details call 916-558-2271 or visit the SCC website at http://www.scc.losrios.edu/nursing/.

A 75% passing grade is mandatory in theory and clinical practicum of each nursing course for progression in the program. In order to obtain a Registered Nursing license as a graduate, a student must have an Associate in Science Degree in Nursing by the end of the fourth semester.

NOTE: In accordance with Regulation 480 of the State Board of Registered Nursing, a person convicted of any offense, other than a minor traffic violation, may not qualify to be licensed as a Registered Nurse. If there are any questions regarding this matter, please contact the State Board of Registered Nursing or visit their website at www.rn.ca.gov.

Eligible students are selected for the program according to the following criteria:

1. Application and acceptance into the Associate in Science Degree Registered Nursing Program at Sacramento City College.
2. BIOL 430, BIOL 431, and BIOL 440 with grades of “C” or better and a cumulative GPA of 3.0 or better.
3. PSYC 300 or PSYC 480; ENGW 300 or ENGW 488; COMM 301 or COMM 331; SOC 321 or SOC 482 or ANTH 310 or ANTH 481 with grades of “C” or better and a cumulative GPA of 2.5 or better.
4. In-progress grades will not be accepted for prerequisite courses.
5. It is strongly recommended that students complete all general education requirements (Area I-VI) and competency requirements (reading, writing, and mathematics) prior to application to the program.
6. Completion of the latest edition of the Test of Essential Academic Skills (TEAS), developed by the Assessment Technologies Institute, LLC (ATI). A minimum composite score is necessary to be eligible for application to the program. Additional information is available from the SCC Nursing website at http://www.scc.losrios.edu/nursing/.
7. The Sacramento City College Nursing Program reserves the right to make changes in the enrollment criteria, academic requirements, grading standards, and other processes without notice at any time.

Enrollment Process

Eligible students are selected for the program according to the following steps:

1. Enrollment criteria, enrollment applications, and deadlines are available from the Sacramento City College nursing website at http://www.scc.losrios.edu/nursing/.
2. The Associate in Science Degree Registered Nursing Program at Sacramento City College uses a multicriteria enrollment process. The latest edition of the ATI Test of Essential Academic Skills (TEAS) must be taken before applying, and a minimum composite score must be achieved in order to apply to the program. A Los Rios Community College District student identification number is required to access the online application. Points earned from the multicriteria enrollment form determine eligibility for the random selection pool from which a class is selected. Students must reapply each semester. There is no waiting list.
3. Applications for enrollment and unofficial transcripts supporting completion of prerequisite courses and graduation course requirements must be submitted to the Science and Allied Health Division by the posted due date. Please see the nursing website at http://www.scc.losrios.edu/nursing/ for more information about the enrollment process.
Upon completion of this program, the student will be able to:

- integrate the nursing process with critical reasoning skills, in direct and indirect nursing care to meet the patient’s developmental and basic human needs.
- revise individualized nursing interventions to safely provide care to assist adult and older adult patients in need of preventative, restorative, or rehabilitative patient centered care.
- incorporate evidence-based practice, patient care standards, informatics, and critical thinking skills to enhance safety, quality improvement, and effectiveness of nursing care.
- generate therapeutic, respectful, and caring communication with patients and families, while promoting collegiality with peers and colleagues.
- formulate accurate and timely documentation and reporting of patient assessments, interventions, progress, and outcomes of care in the written and electronic medical record.
- design patient-centered teaching plans and assist patients and their families in developing self-advocacy skills necessary to maintain optimum levels of functioning and health.
- manage the nursing care for a group of patients, utilizing leadership skills, collaboration, teamwork, resource utilization, and supervision of team members consistent with their scope of practice.
- prioritize patient care needs, using critical thinking and time management skills, to organize and provide safe nursing care in a responsible and accountable manner.
- integrate ethical principles, legal boundaries, and cultural competency in all areas of nursing practice.
- assess learning needs through reflective thinking and use resources to engage in continuous improvement in skills and knowledge.

Total Program Units 74-75

Nursing, Registered (NURSE)

NURSE 299  Experimental Offering in Nursing .5-4 Units

Prerequisite: None

Hours: 90 hours LEC

See Experimental Offerings

NURSE 307  LVN-RN (Associate Degree Nursing) Transition 5 Units

Prerequisite: See Enrollment Limitation

Enrollment Limitation: Acceptance into the LVN-RN 30 unit option track and completion of BIOL 431 and BIOL 440 with grades of “B” or better.

Course Transferable to CSU

Hours: 54 hours LEC; 108 hours LAB

This course is designed for the California Licensed Vocational Nurse (LVN) who is admitted for advanced placement into the second year of the Registered (Associate Degree) Nursing Program. Theory and clinical experiences are related to helping medical surgical adult and older adult patients adapt to acute and chronic pathophysiological stressors in preventative, restorative, or rehabilitative settings. Content focuses on the LVN (Licensed Vocational Nurse) transitioning into the role of the associate degree RN (Registered Nurse). The concepts of basic human needs, safety, human development, nutrition, communication, sexuality, cultural and spiritual diversity, legal and ethical aspects of nursing, pharmacology and pathophysiology, are integrated in the course. Emphasis is given to clinical decision making, critical thinking, safety, teamwork, and collaboration.

NURSE 308  LVN-RN 30-Unit Option 8 Units

Prerequisite: See enrollment limitations.

Enrollment Limitation: Acceptance into the LVN-RN 30 unit option track and completion of BIOL 431 and BIOL 440 with grades of “B” or better.

Course Transferable to CSU

Hours: 72 hours LEC; 216 hours LAB

This course, designed for the LVN-RN 30 unit option student, emphasizes theory and clinical experiences related to helping patients and families adapt to complex pathophysiological and pathopsychological stressors. This course focuses on the care of the medical, surgical, and psychiatric nursing patient to meet his/her needs for risk reduction and optimal wellness in preventative, restorative, or rehabilitative settings. The sub-concepts integrated throughout the course include safety, human development, nutrition, sexuality, cultural and spiritual diversity, pathophysiology, pharmacology, legal and ethical principles. Course emphasis is on mental health and psychopathology, acute advanced medical and surgical content, end-of-life care, and evaluation of patient-centered outcomes. Learning experiences in the classroom, simulation lab, and clinical setting provide students the opportunity to utilize critical thinking, evidence-based practice, technology, teamwork, collaboration, clinical decision-making, and interdisciplinary communication principles in the delivery of quality nursing care.
NURSE 315  Pharmacology and Implications  3 Units
for Nursing
Prerequisite: None.
Advisory: BIOL 100 (Introduction to Concepts of Human Anatomy and
Physiology) with a “C” or better
Course Transferable to CSU
Hours: 54 hours LEC
This course is an introduction to the science of pharmacology and
nursing. The role of the nurse in safely administering medications and
evaluating the therapeutic response is emphasized. Drug classifica-
tions and their actions, interactions, and adverse effects, are specific-
ally related to patient developmental stages and nursing professional
standards.

NURSE 325  Medical Dosage Calculations  1 Unit
Prerequisite: None.
Course Transferable to CSU
Hours: 18 hours LEC
This course prepares students to accurately calculate oral and paren-
teral drug dosages for medication administration. Students will learn
two systems of measurement and conversion from one system to
another. Basic flow rates of IV fluids will be covered. Course content
will also include: 1) review of basic arithmetic operations used in dos-
age calculations; 2) interpretation of drug labels; 3) common medical
abbreviations used in dosage calculations; 4) use of the following
methods: basic formulas, ratio and proportion, fractional equation, and
dimensional analysis in dosage calculations. Calculators will not be
used in this course.

NURSE 407  Fundamentals of Health and  12 Units
Nursing Care
Prerequisite: See Enrollment limitations
Advisory: FCS 324, NUTRI 300, or PSYC 370; with grades of “C” or
better.
Enrollment Limitation: Acceptance into the Registered (Associate
Degree) Nursing Program and completion of BIOL 430, BIOL 431,
and BIOL 440 with grades of “C” or better and a cumulative GPA
of 3.0 or better. PSYC 300 or PSYC 480; ENGWR 300 or ENGWR
480 or, COMM 301 or COMM 331; SOC 321 or ANTH 310 or
ANTH 481 with grades of “C” or better and a cumulative GPA of
2.5 or better. It is strongly recommended that students complete
all general education requirements (Area I-VI) and competency
requirements (reading, writing, and mathematics) prior to applica-
tion to the program.
Course Transferable to CSU
Hours: 108 hours LEC; 324 hours LAB
This course utilizes the conceptual framework of the curriculum (Basic
Human Needs, Life Cycle Development, Health Illness Continuum,
Significant Health Problems, and Stress Adaptation) to provide
the foundation for the following three semesters of the program. It
includes an introduction to professional nursing, its evolution, present
trends and issues, legal aspects, and concepts underlying current
practice. Basic principles of delegation, management, teamwork, and
collaboration are introduced and integrated into appropriate content.
The theory and related clinical experiences prepare the student to ap-
ply the nursing process when providing direct patient care to patients
with common medical surgical problems, with a focus on basic hu-
mans needs. The student is introduced to critical thinking and clinical
decision-making, while using evidence-based practice to support
patients’ adaptive mechanisms for attaining and maintaining wellness
during early, middle, and late adulthood. The sub concepts integrated
throughout the course are personal hygiene, safety, nutrition, com-
munication, human sexuality, cultural/spiritual diversity, legal/ethical
aspects, pharmacology, and pathophysiology. Emphasis is given to
the promotion of health and risk reduction in adults and elders in theory,
clinical, and the simulation lab.

NURSE 417  Nursing and Health  12 Units
Maintenance Through the Lifecycle
Prerequisite: NURSE 407 with a grade of “C” or better
Enrollment Limitation: Enrollment in Associate Degree Nursing (Regis-
tered Nursing) program
Course Transferable to CSU
Hours: 108 hours LEC; 324 hours LAB
This course continues integration of the conceptual framework of the
curriculum (Basic Human Needs, Life Cycle Development, Health
Illness Continuum, Significant Health Problems, and Stress Adapta-
tion). The second semester provides theory and clinical experiences
for medical surgical, pediatric, and maternal-child patients in need of
preventative, restorative, or rehabilitative nursing care, in acute, home,
or community settings. Content focuses on application of patient-
centered care and health promotion principles to prevent illness and
achieve optimum wellness. There is emphasis on the utilization of the
nursing process, critical thinking, evidence-based practice, safety,
life cycle development, nutrition, communication, human sexuality,
cultural/spiritual diversity, self-advocacy, legal/ethical aspects, quality
improvement, teamwork and collaboration, pharmacology, and patho-
physiology. Learning experiences provide students with opportunities
to acquire new clinical skills, develop clinical judgment, use reflective
practice, and apply previously learned concepts and principles in a
variety of settings including the classroom, clinical, and simulation lab.

NURSE 427  Nursing Complex Health  12 Units
Problems Through the Life Cycle
Prerequisite: NURSE 417 with a grade of “C” or better
Enrollment Limitation: Enrollment in Associate Degree Nursing (Regis-
tered Nursing) program
Course Transferable to CSU
Hours: 108 hours LEC; 324 hours LAB
This course emphasizes theory and clinical experiences related to
helping patients and families adapt to complex pathophysiological
and pathopsychological stressors. This course focuses on the care
of the medical, surgical, and psychiatric nursing patient to meet his/ her
needs for risk reduction and optimal wellness in preventative,
restorative, or rehabilitative settings. The sub-concepts integrated
throughout the course include safety, human development, nutrition,
sexuality, cultural and spiritual diversity, pathophysiology, pharmacol-
y and legal/ethical principles. Course emphasis is on mental health
and psychopathology, medical surgical content, end-of-life care, and
evaluation of patient-centered outcomes. Learning experiences in
the classroom, simulation lab, and clinical setting provide students
the opportunity to utilize critical thinking, evidence-based practice,
technology, teamwork, collaboration, clinical decision-making, and
interdisciplinary communication principles in the delivery of quality
nursing care.
NURSE 437  Nursing in Complex and Multiple Patient Care
12 Units
Prerequisite: NURSE 427 with a grade of “C” or better
Enrollment Limitation: Enrollment in the Associate Degree Nursing (Registered Nursing) program
Course Transferable to CSU
Hours: 108 hours LEC; 324 hours LAB
This final semester course presents theory and evidence-based practice related to multiple patient assignments for patients with complex, critical health problems in the acute medical surgical setting. The student will use the nursing process to provide for the patient's basic human needs in a safe and effective care environment. The learning experiences in the classroom, simulation lab, and acute hospital setting, including clinical preceptorships, provide the student with opportunities to continue refining assessment skills, emphasizing priority setting, time management, clinical decision making, critical thinking, leadership, management, ethical/legal concepts, teamwork, and collaboration. There is continued integration of the curriculum framework and sub-concepts throughout the course, including basic human needs, life cycle development, communication, nutrition, pathophysiology, pharmacology, and cultural/spiritual diversity. There is emphasis on entry-level nursing practice, the professional nursing role, use of informatics, quality improvement, and current health care policy and finance.

NURSE 499  Experimental Offering in Nursing
.5-4 Units
Prerequisite: None
Course Transferable to CSU
Hours: 54 hours LEC; 63 hours LAB
See Experimental Offering
