# Mathematics

## Associate in Science Degree

### Program Information
The mathematics program provides students the opportunity to complete the lower-division coursework required for four-year programs in mathematics. For students who plan to transfer, completion of the CSU General-Breadth or IGETC general education pattern is encouraged. It is highly recommended that students meet with a counselor because major and general education requirements vary for each college/university. These courses also fulfill general education requirements for allied health, biological sciences, physical sciences, computer science and engineering.

Note: Students planning to transfer to four-year institutions are advised to meet with a counselor for general education requirements.

### Career Opportunities
Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners and educators. This major is designed to meet some of the lower-division requirements for a major in Mathematics.

### Upon completion of this program, the student will be able to:
- explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems.
- explain and apply basic concepts of multivariable calculus, linear algebra, or differential equation techniques, their interconnections, and their uses in analyzing and solving real-world problems.
- write logical proofs of basic theorems.
- analyze and evaluate various theoretical and real-world problems and analyze existing solutions or create and evaluate novel solutions using mathematics, logic, and technology as appropriate.

### Required Program

A minimum of 3 units from the following:
- CISP 360 Introduction to Structured Programming (4)
- CISP 400 Object Oriented Programming with C++ (4)
- CISP 401 Object Oriented Programming with Java (4)
- ENGR 405 Engineering Problem Solving (3)
- PHIL 325 Symbolic Logic (3)
- STAT 300 Introduction to Probability and Statistics (4)
  - or STAT 480 Introduction to Probability and Statistics – Honors (4)

Total Units Required: 25

## Associate in Science (A.S.) Degree
The Associate in Science degree may be obtained by completion of all courses in the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See SCC graduation requirements.

### Associate Degree for Transfer

**Mathematics**

Associate in Science for Transfer

### Program Information
The mathematics program provides students the opportunity to complete the lower-division coursework required for four-year programs in mathematics. This program is for students who plan to transfer to a California State University (CSU). Completion of the CSU General-Breadth or IGETC general education pattern is required. It is highly recommended that students meet with a counselor because major and general education requirements vary for each college/university.

The Associate Degree for Transfer (ADT) student completion requirements (as stated in SB1440 law):

1. Completion of a minimum of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
   - (A) The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements (CSU GE-Breadth).
   - (B) A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
2. Obtainment of a minimum grade point average of 2.0.

ADTs also require that students must earn a “C” or better in all courses required for the major or area of emphasis.

### Career Opportunities
Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners, and educators. This major is designed to meet the lower-division requirements for most bachelor’s degrees in Mathematics.

### Upon completion of this program, the student will be able to:
- explain and apply basic concepts of single variable calculus including various forms of derivatives and integrals, their interconnections, and their uses in analyzing and solving real-world problems.
- explain and apply basic concepts of multivariable calculus, linear algebra, or differential equation techniques, their interconnections, and their uses in analyzing and solving real-world problems.
- write logical proofs of basic theorems.

### Associate in Science for Transfer Degree
The Associate in Science in Mathematics for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.
For students taking their first transfer-level mathematics course, Sacramento City College offers mathematics support courses (see MATHS). These courses can be found in the next section following the MATH courses.

**Mathematics (MATH)**

**MATH 14**  Preparation for Math – Success Academy  
1 Unit  
Prerequisite: Placement through the assessment process.  
Hours: 18 hours LEC  
This course provides an introduction to student learning expectations and the outcomes of higher education. This course has a specific focus on math preparation through the implementation of individualized group instruction for students. This course is primarily intended for students who will be taking an Arithmetic, Pre-Algebra, Elementary Algebra, or Intermediate Algebra course in the upcoming semester.

**MATH 27**  Self-Paced Basic Skills Mathematics  
.5-2 Units  
Prerequisite: None.  
Hours: 24 hours LEC; 108 hours LAB  
This is a self-paced course in basic mathematics skills including the basic operations of addition, subtraction, multiplication, and division applied to the whole numbers, fractions, and decimals. This course is graded Pass/No Pass. Credit is earned in one-half unit increments and is dependent on progress in the course and class participation. This is an open-entry/open-exit course which may be taken for a maximum of two units. This course does not fulfill the learning skills requirement for graduation.

**MATH 28**  Basic Skills Mathematics  
3 Units  
Prerequisite: None.  
Hours: 54 hours LEC; 18 hours LAB  
This is a lecture course with lab time in basic mathematics skills including the basic operations of addition, subtraction, multiplication, and division applied to the whole numbers, fractions, and decimals. This course does not fulfill the learning skills requirement for graduation.

**MATH 34**  Pre-algebra  
4 Units  
Prerequisite: MATH 28 with a “C” or better, or completion of the MATH 27 curriculum (80% or higher on all six chapter tests), or placement through the assessment process.  
Hours: 72 hours LEC  
The emphasis in this course will be on skills necessary for success in elementary algebra. Course content will include review of fundamentals of arithmetic including whole numbers, common fractions, decimal fractions, and percentages. Other topics include order of operations, signed numbers, complex fractions, exponents, and scientific notation. There will be an introduction to the algebra of polynomials and/or an introduction to graphing lines, as time permits.

**MATH 80**  Mathematics Study Skills  
1 Unit  
Prerequisite: MATH 28 with a grade of “C” or better, or completion of the MATH 27 curriculum (80% or higher on all six chapter tests), or placement through the assessment process, or concurrent enrollment in either MATH 27 or MATH 28.  
Advisory: ENGRD 110 with a grade of “C” or better  
Hours: 18 hours LEC  
This course will help students increase their motivation and confidence and maximize their abilities in any mathematics course. Students will consider their current levels of math and test anxieties and make progress in lowering them to a productive level. Students will gain strategies to overcome barriers to mathematical success. Specific concepts will be designed for the current level of each student. This course is primarily intended for students who will be taking another mathematics or statistics course concurrently, but students may also take this course as preparation before enrolling in a mathematics or statistics course. This course is graded as Pass/No Pass.

**MATH 100**  Elementary Algebra  
5 Units  
Prerequisite: MATH 34 with a grade of “C” or better, or placement through the assessment process.  
Hours: 90 hours LEC  
This course includes the fundamental concepts and operations of algebra with problem solving skills emphasized throughout. Topics include properties of real numbers, linear equations and inequalities, integer exponents, polynomials, polynomial factorization, rational expressions and equations, radical expressions and equations, rational exponents, systems of linear equations and inequalities, the rectangular coordinate system, graphs and equations of lines, and quadratic equations.

**MATH 103**  Elementary Algebra, Part I  
3 Units  
Prerequisite: MATH 34 with a grade of “C” or better, or placement through the assessment process.  
Hours: 54 hours LEC  
This course will cover the first half of the traditional MATH 100 course. Topics include: properties of real numbers, linear equations and inequalities, integer exponents, polynomials, systems of linear equations and inequalities, the rectangular coordinate system, graphs and equations of lines, and applications.

**MATH 104**  Elementary Algebra, Part II  
3 Units  
Prerequisite: MATH 103 or 134 with a grade of “C” or better  
Hours: 54 hours LEC  
This course covers the second half of the traditional MATH 100 course. Topics include: polynomial factorization, rational expressions and equations, radical expressions and equations, rational exponents, quadratic equations, and applications.

**MATH 109**  Fundamentals of Algebra for Liberal Arts Mathematics and Statistics  
4 Units  
Prerequisite: MATH 34 with a grade of “C” or better, or placement through the assessment process.  
Hours: 72 hours LEC  
This course consists of elements of beginning and intermediate algebra needed for STAT 300, MATH 300, or MATH 310. Topics include modeling using expressions, equations, functions, and graphs; polynomial inequalities. Note: This course is not intended for students pursuing business or STEM majors and who plan to take courses in science, computer information science, engineering, mathematics, physics, chemistry, business or economics.
Pathway for Programs Requiring Statistics or Students Using Statistics to Satisfy General Education Requirements

**MATH 109** Fund of Alg for Stat and Liberal Arts Mat (4 units) → **STAT 300** Introduction to Probability and Statistics (4 units) → **STAT 110** Support for Intro to Prob and Stat (2 units) → **STAT 100** Prestatistics (4 units)

Some students may be required to take the corequisite support course STAT 110 as part of their STAT 300 placement. Alternatively, these students can take MATH 109 or STAT 100 prior to taking STAT 300 without support.

Pathway for Students Using MATH 300 to Satisfy General Education Requirements

**MATH 109** Fund of Alg for Stat and Liberal Arts Math (4 units) → **MATH 300** Introduction to Mathematical Ideas (3 units) → **MATHS 100** Support for Intro to Mathematical Ideas (2 units)

Some students may be required to take the corequisite support course MATHS 100 as part of their MATH 300 placement. Alternatively, these students can take MATH 109 prior to taking MATH 300 without support.

Pathways for Students Majoring in Business

**MATH 340** Calculus for Business and Economics (3 units) → **MATH 342** Modern Business Mathematics (3 units) → **MATHS 140** Support for Calc for Bus and Econ (3 units) → **MATHS 142** Support for Modern Business Mathematics (3 units)

Some students may be required to take the corequisite support courses MATHS 140/142 as part of their MATH 340/342 placement. Students that have not successfully completed Algebra II or Integrated Math III in high school will be required to take MATH 120 prior to taking MATH 340/342 (without support).
Pathway for Programs Requiring MATH 355/356

MATH 373
Trigonometry for Calculus
(4 units)

MATH 355
Calculus for Biology and Medicine I
(4 units)

MATH 356
Calculus for Biology and Medicine II
(4 units)

MATHS 173
Support for Trig for Calculus
(2 units)

Some students may be required to take the corequisite support course MATHS 173 as part of their MATH 373 placement. Students that have not successfully completed Algebra II or Integrated Math III in high school will be required to take MATH 120 prior to taking MATH 373 (without support).

Pathway for Programs Requiring MATH 400

MATH 372
Algebra for Calculus
(4 units)

MATHS 172
Support for Algebra for Calculus
(3 units)

MATH 373
Trigonometry for Calculus
(4 units)

MATHS 173
Support for Trig for Calculus
(2 units)

MATH 400
Calculus I
(5 units)

MATH 401
Calculus II
(5 units)

MATH 402
Calculus III
(5 units)

MATH 410
Linear Algebra
(3 units)

MATH 420
Differential Equations
(4 units)

Some students may be required to take the corequisite support courses MATHS 172/173 as part of their MATH 372/373 placement. Students that have not successfully completed Algebra II or Integrated Math III in high school will be required to take MATH 120 prior to taking MATH 372/373 (without support).

</table>
MATH 299  Experimental Offering in Mathematics  .5-10 Units
Prerequisite: None
Hours: 90 hours LEC; 18 hours LAB
See Experimental Offering.

MATH 300  Introduction to Mathematical Ideas  3 Units
Prerequisite: MATH 109, 120, 121, 124, or 135 with a grade of “C” or better, or placement through the assessment process.
General Education: AA/AS Area I(b); CSU Area B4; IGETC Area 2
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is intended to help the non-Mathematics major student relate to the spirit of mathematics through a study of some engaging ideas of mathematics. Several specific topics will be chosen from: numeration systems, logic, sets, number theory, algebraic modeling, geometry, combinatorics, probability, statistics, consumer mathematics, graph theory, voting and apportionment, matrices, and perhaps others. This course is not recommended for students entering elementary school teaching or for business administration majors. (Competency: Mathematics)

MATH 310  Mathematical Discovery  3 Units
Prerequisite: MATH 109, MATH 120, MATH 121, MATH 124, or MATH 135 with a grade of “C” or better or placement through the assessment process; AND MATH 110 or two semesters of high school Geometry with grades of “C” or better.
General Education: AA/AS Area I(b); CSU Area B4
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is designed to introduce students to the spirit of mathematics by involving them in aspects of mathematical processes of exploration, conjecture, and proof. Students will examine mathematical patterns and relations, formulate conjectures, and prove their conjectures. Educational standards and issues are a focus throughout the content of the course. Areas of mathematics from which content may be derived include number theory, statistics, probability, geometry, and sequences and series. This course is recommended for students interested in a career in education. (Competency: Mathematics)

MATH 335  Trigonometry with College Algebra  5 Units
Prerequisite: MATH 120, 121 or MATH 124 with a grade of “C” or better or placement through the assessment process; AND MATH 110 or a college Geometry course or two semesters of high school Geometry with a grade of “C” or better.
General Education: AA/AS Area I(b); CSU Area B4
Course Transferable to CSU
Hours: 90 hours LEC
This is a full trigonometry course with algebra concepts reviewed, extended, and integrated when they are relevant to the trigonometric concepts. The trigonometric topics include right triangle trigonometry, unit circle trigonometry, graphs of trigonometric functions, proofs of trigonometric identities, solving trigonometric equations, applications of trigonometric functions (laws of sines and cosines), inverse trigonometric functions, the polar coordinate system, and vectors. The algebra topics include translations and stretches of graphs, graphs of polynomial and rational functions, domain and range, even and odd functions, inverse functions, simplifying and factoring expressions, and equation solving. (Competency: Mathematics)

MATH 340  Calculus for Business and Economics  3 Units
Prerequisite: MATH 120, 121, or 124 with a grade of “C” or better, or placement through the assessment process.
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
Course Transferable to UC/CSU
Hours: 54 hours LEC
The content of this course includes review of the logarithmic and exponential functions, intuitive introduction to limits, and development of the derivative and definite integral. Application of these concepts to economics and business will be emphasized. (C-ID MATH 140; Competency: Mathematics)

MATH 342  Modern Business Mathematics  3 Units
Prerequisite: MATH 120, 121, or 124 with a grade of “C” or better, or placement through the assessment process.
General Education: AA/AS Area II(b); CSU Area B4
Course Transferable to CSU
Hours: 54 hours LEC
This course is designed around applications of mathematics in economic and business contexts. Specific topics will include functions and related business formulas, tables and graphs, finance (interest, annuities, and exponential models in economics), rates of change including applications and optimization, and linear programming.

MATH 350  Calculus for the Life and Social Sciences I  3 Units
Prerequisite: MATH 335 with a grade of “C” or better, or placement through the assessment process.
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is an introduction to calculus. Topics include functions, trigonometric functions, limits, analytic geometry, and differential calculus with applications to biological and social sciences. This course is intended for students majoring in the biological and social sciences and some business majors.

MATH 351  Calculus for the Life and Social Sciences II  3 Units
Prerequisite: MATH 350 with a grade of “C” or better
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is a continuation of MATH 350. Topics include: definite and indefinite integrals, power series, analytic geometry, multivariate calculus, and differential equations, with applications to life and social sciences.
MATH 352  Calculus for the Life and Social Sciences III  
Prerequisite: MATH 351 with a grade of “C” or better or concurrent enrollment in MATH 351  
General Education: AA/AS Area II(b); CSU Area B4  
Course Transferable to UC/CSU  
Hours: 36 hours LEC  
This course, along with MATH 350 and MATH 351, completes the UC calculus sequence for some biology and medicine majors. The topics include solving first-order linear differential equations using integrating factors, equilibria and stability, matrices, eigenvalues and eigenvectors, analytic geometry, directionals derivatives and gradient vectors, chain rule for functions of several variables, optimization and applications, theory, modeling and applications of linear and nonlinear systems of ordinary differential equations, permutations and combinations, probability, conditional probability, independence, and Bayes’ formula and applications.

MATH 355  Calculus for Biology and Medicine I  
Prerequisite: MATH 373 with a grade of “C” or better, or placement through the assessment process.  
Advisory: MATH 372 with a grade of “C” or better  
General Education: AA/AS Area II(b)  
Course Transferable to CSU  
Hours: 72 hours LEC  
This course is an introduction to differential calculus and elementary differential equations via applications in biology and medicine. It covers limits, derivatives of polynomials, trigonometric and exponential functions, graphing, and applications of the derivative to biology and medicine. Topics include the Fundamental Theorem of Calculus and techniques of integration, including integral tables and numerical methods. This course does not meet the prerequisite for PHYS 410.

MATH 356  Calculus for Biology and Medicine II  
Prerequisite: MATH 355 with a grade of “C” or better, or placement through the assessment process.  
General Education: AA/AS Area II(b)  
Course Transferable to CSU  
Hours: 72 hours LEC  
This course is the continuation of MATH 355. It covers matrix algebra with eigenvalues and eigenvectors, systems of linear equations, functions of several variables, partial derivatives, systems of differential equations, probability, and applications to biology and medicine. This course does not meet the prerequisite for PHYS 410 or PHYS 420.

MATH 370  Pre-Calculus Mathematics  
Prerequisite: MATH 335 with a grade of “C” or better, or placement through the assessment process.  
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2  
Course Transferable to UC/CSU  
Hours: 90 hours LEC  
This course is designed to prepare students for MATH 400, 401, and 402. A brief review is followed by an in-depth extension of the properties of polynomial, rational, exponential, logarithmic, and trigonometric functions. Additional topics include inequalities, systems of non-linear equations, conic sections, sequences and series, analytic geometry, polar and parametric equations, and matrices. Graphing calculators may be required for this course.

MATH 372  College Algebra for Calculus  
Prerequisite: MATH 120 or 124 with a grade of “C” or better, or placement through the assessment process.  
General Education: AA/AS Area II(b)  
Course Transferable to CSU  
Hours: 72 hours LEC  
This course provides a rigorous treatment of college-level algebra and its applications, with a particular focus on preparing students for the calculus sequence for Science, Technology, Engineering, and Mathematics (STEM) majors. Topics include polynomial, rational, radical, exponential, absolute value, and logarithmic functions, graphs, and equations; systems of equations; the theory of polynomial equations; analytic geometry including conics; sequences and series; and mathematical induction. Emphasis is given to analytical reasoning and problem-solving. This course may be taken concurrently with MATH 373, Trigonometry for Calculus. Completion of both MATH 372 AND MATH 373 with grades of “C” or better meets the prerequisite for MATH 400, Calculus I.

MATH 373  Trigonometry for Calculus  
Prerequisite: MATH 120 or 124 with a grade of “C” or better, or placement through the assessment process.  
General Education: AA/AS Area II(b)  
Course Transferable to CSU  
Hours: 72 hours LEC  
This course provides a rigorous treatment of trigonometry and its applications, with a particular focus on preparing students for the calculus sequence for Science, Technology, Engineering, and Mathematics (STEM) majors. Topics include right triangle trigonometry, unit circle trigonometry, graphs of trigonometric functions, proofs of trigonometric identities, solving trigonometric equations, applications of trigonometric functions (laws of sines and cosines), inverse trigonometric functions, the polar coordinate system, and vectors. Emphasis is given to analytical reasoning and problem-solving. This course may be taken concurrently with MATH 372, College-Algebra for Calculus. Completion of both MATH 372 AND MATH 373 with grades of “C” or better meets the prerequisite for MATH 400, Calculus I.

MATH 400  Calculus I  
Prerequisite: MATH 372 and MATH 373, or MATH 370 or placement through the assessment process.  
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2  
Course Transferable to UC/CSU  
Hours: 90 hours LEC  
This course explores the basic concepts of analytic geometry, limits (including indeterminate forms), derivatives, and integrals. The topics covered will include graphs, derivatives, and integrals of algebraic, trigonometric, exponential, logarithmic, and hyperbolic functions. Standard proofs will be covered, such as delta-epsilon proofs and proofs of some theorems. Applications will be covered, including those involving rectilinear motion, differentials, related rates, graphing, and optimization. (Competency: Mathematics)

MATH 401  Calculus II  
Prerequisite: MATH 400 with a grade of “C” or better  
General Education: AA/AS Area II(b); CSU Area B4; IGETC Area 2  
Course Transferable to UC/CSU  
Hours: 90 hours LEC  
This course is a continuation of MATH 400. Topics covered will include techniques of integration, numerical integration, improper integrals, infinite series, parametric equations, polar coordinates, and possibly conic sections. Many applications will be covered including those involving areas between plane regions, volumes of revolution, work, moments and centers of mass, average value, arc length, and surface area. (C-ID MATH 220)

<td>90</td>
<td>This course extends the concepts of limits, derivatives, and integrals to vector-valued functions and functions of more than one variable. The topics covered include three-dimensional analytic geometry and vectors, partial derivatives, multiple integrals, line integrals, surface integrals, and the theorems of Green, Gauss (Divergence), and Stokes. Many applications of calculus are included. (Competency: Mathematics)</td>

MATHEMATICS
The courses below are designed to provide additional support for students taking their first transfer-level mathematics course.

### Mathematics Support (MATHS)

**MATHS 100  Support for Introduction to Mathematical Ideas**  
2 Units  
Prerequisite: None.  
Corequisite: MATH 300  
Hours: 36 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Introduction to Mathematical Ideas. Topics and homework assignments are often connected to the students' assignments in MATH 300. Students who completed this topic as MATHS 299 are not eligible to take this course. This course is graded as Pass/No Pass.

**MATHS 110  Support for Mathematical Discovery**  
2 Units  
Prerequisite: None.  
Corequisite: MATH 310  
Hours: 36 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Mathematical Discovery (MATH 310). Topics and homework assignments are often connected to the students' assignments in MATH 310. This course is graded as Pass/No Pass.

**MATHS 120  Support for Intermediate Algebra**  
3 Units  
Prerequisite: None.  
Corequisite: MATH 120  
Hours: 54 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 120, Intermediate Algebra. Topics and homework assignments are often connected to the students' assignments in MATH 120. Students who completed this topic as MATHS 299 are not eligible to take this course. This course is graded as Pass/No Pass.

**MATHS 135  Support for Trigonometry with College Algebra**  
3 Units  
Prerequisite: None.  
Corequisite: MATH 335  
Hours: 54 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 335: Trigonometry with College Algebra. Topics and homework assignments are often connected to the students' assignments in MATH 335. The course includes applications of the concepts and skills covered. Students who completed this topic as MATHS 299 are not eligible to take this course. This course is graded as Pass/No Pass.

**MATHS 140  Support for Calculus for Business and Economics**  
3 Units  
Prerequisite: None.  
Corequisite: MATH 340  
Hours: 54 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Calculus for Business and Economics (MATH 340). Topics and homework assignments are often connected to the students' assignments in MATH 340. The course includes applications of the concepts and skills covered. This course is graded as Pass/No Pass. Students who have taken this course as MATHS 299 are not eligible to take this course.

**MATHS 142  Support for Modern Business Mathematics**  
3 Units  
Prerequisite: None.  
Corequisite: MATH 342  
Hours: 54 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Modern Business Mathematics. Topics and homework assignments are often connected to the students' assignments in MATH 342. The course includes applications of the concepts and skills covered. Students who completed this topic as MATHS 299 are not eligible to take this course. This course is graded as Pass/No Pass.

**MATHS 172  Support for College Algebra for Calculus**  
3 Units  
Prerequisite: None.  
Corequisite: MATH 372  
Hours: 54 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 372: College Algebra for Calculus. Topics and homework assignments are often connected to the students' assignments in MATH 372. The course includes applications of the concepts and skills covered. This course is graded as Pass/No Pass.

**MATHS 173  Support for Trigonometry for Calculus**  
2 Units  
Prerequisite: None.  
Corequisite: MATH 373  
Hours: 36 hours LEC  
This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 373: Trigonometry for Calculus. Topics and homework assignments are often connected to the students' assignments in MATH 373. The course includes applications of the concepts and skills covered. This course is graded as Pass/No Pass.

**MATHS 299  Experimental Offerings in Mathematics Support**  
.5-4 Units  
Prerequisite: None  
Hours: 72 hours LEC  
See Experimental Offerings
